### CAREER OBJECTIVE

A full-stack developer with a passion for developing scalable applications. I have built several micros and major projects solo and on a team.

I recently completed a fully functional web application called wedding wheel, where intending couples can seamlessly plan their wedding, from scheduling to-dos to arranging their guest lists and finding the right vendor within their locality.

### WORK EXPERIENCE

#### Full-Stack Developer Intern

Moat Academy For Developers August, 2022 - November 2022

- Advanced **HTML, CSS** and responsive design (**Bootstrap**).
- Learned the basics of **HTML, and CSS** and how to create and style **HTML** pages.
- Learned how to style an **HTML** page with **CSS** and how to target certain design elements in my code.
- Advanced **Javascript** techniques (ES6).
- Learned **JavaScript, jQuery, Reactjs** and how to animate certain elements of your code.
- **APIs**. Learned how to integrate a live **API** into my applications.
- Learned how to use **Git** and **GitHub** to manage my code for a streamlined development workflow.
- Learned how to use **AJAX/JSON** in retrieving data fast and dynamically.
- Advanced knowledge of **MySQL** which I have demonstrated through its implementation in several projects.
- Very solid knowledge of the **Python** programming language.
- Learned the **Flask** framework which I have been able to use in building fully functional web applications solo.
- Analyzed and optimized performance bottlenecks in existing back-end systems, such as database queries and storage solutions, to increase responsiveness.
- Diagnosed and fixed report functionality issues by troubleshooting.

### Software Projects

#### Wedding Wheel

- A fully responsive and interactive application for seamless wedding planning with an interface designed for couples, vendors and overseers by an admin.
- The vendors, couples and admins have a wide range of activities they can carry out independently.
- I built the application using **HTML, CSS, BOOTSTRAP, JS, jQuery, Flask, AJAX, JSON, MySQL and API**.

- The Application contains several advanced features for optimum performance and user experience.
  - The demo can be accessed on my GitHub page.
- 

## Dev Conference

- A tech event demo web application built in a team using **HTML, CSS, BOOTSTRAP, JS, jQuery, Flask, AJAX, JSON, MySQL and API.**
  - The demo can be accessed on my GitHub page.
- 

## BMI Calculator

- A BMI calculator that opens a file and documents the result with the name entered on each input.
  - This was built using **Python**
  - The demo can be accessed on my GitHub page.
- 

## Demo Portfolio website

- I built a responsive demo portfolio website some months ago using only **HTML and CSS.**
  - The demo can be accessed on my GitHub page.
- 

## Python Games

- I have built **Python** games, including **Leap Year Calculator, Caesar Cipher, Password Generator, Rock, Paper and Scissors Game, Pizza-Order-Generator, Love Calculator, Head or Tail, Secret Auction, Hangman Game, Roblox Game, Simple Treasure Game, Python Calculator, amongst others.**
  - Some of these games can be assessed on my Github page
- 

## Professional Development and Certifications

- Full-Stack Development. Training - Moat Academy
- 100 days of Code - Python by Angela Yu on Udemey
- The complete web development Bootcamp - Angela Yu on Udemey
- Free Code Camp
